VOL 2 APRIL-MAY 2021

New Shoots

The Ambience Newsletter

Greetings!

Each one of us has an 'Inner Child' which is known to be the source of our emotional strength and well being. As we nurture and nourish our inner child, our mind opens up to new ideas and wellbeing. At Ambience Public School, Gurugram the inner child is free to manifest itself through plethora of joyful activities and experiences. It is fostered with utmost care as we believe it is vital for the development of an empowered human being.

Our Newsletter is the celebration of the creative exploits of our learners. It also maps their journey of connecting with their 'inner child'. The present ongoing conditions have pushed us to focus on resilience and exploration of our inner self. It gives me immense happiness to share the efforts put by our leaners towards the path to discover their 'inner child'.

Let's keep moving and keep learning.

Best Wishes, stay healthy and safe !

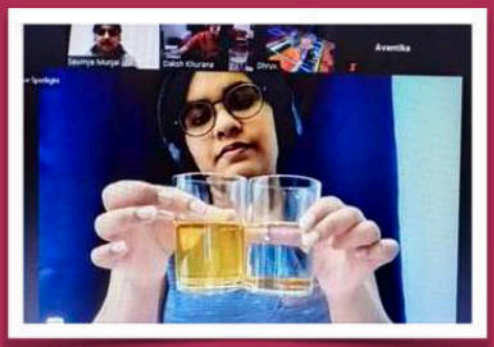

Vivek (Vice-Principal)

Iknoor Kaur Matharua of KG for winning "special jury mention award" at DPSI '2020-21

Creating bridges through cultural understanding

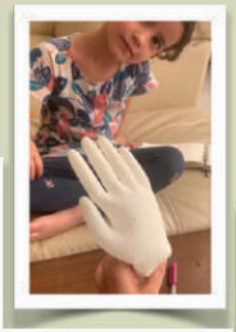

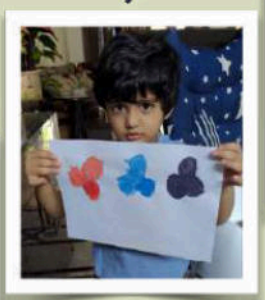

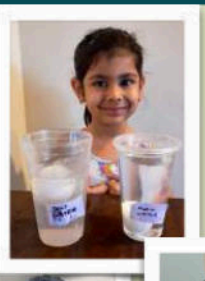

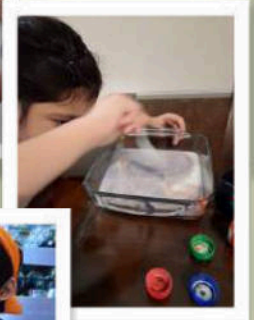

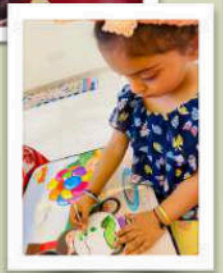

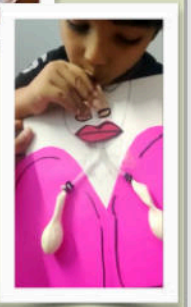

THE LITTLE PRE PRIMARY ARTISTS

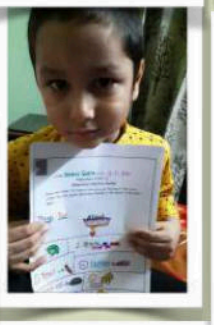

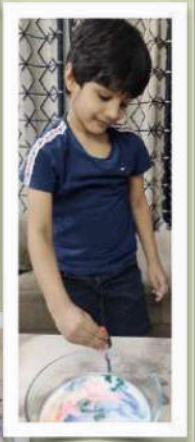

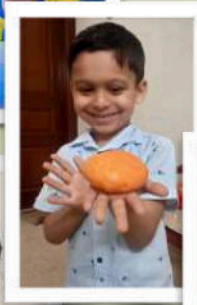

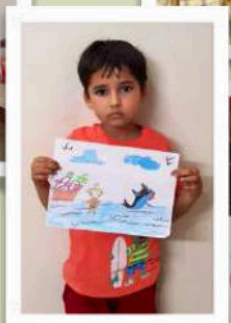

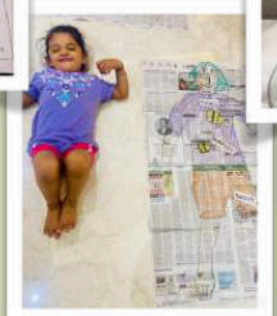

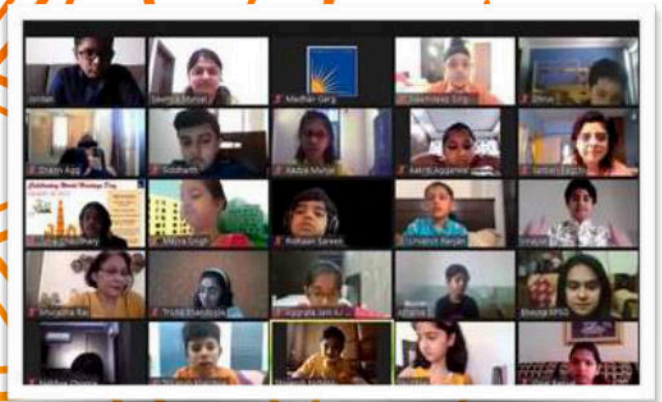

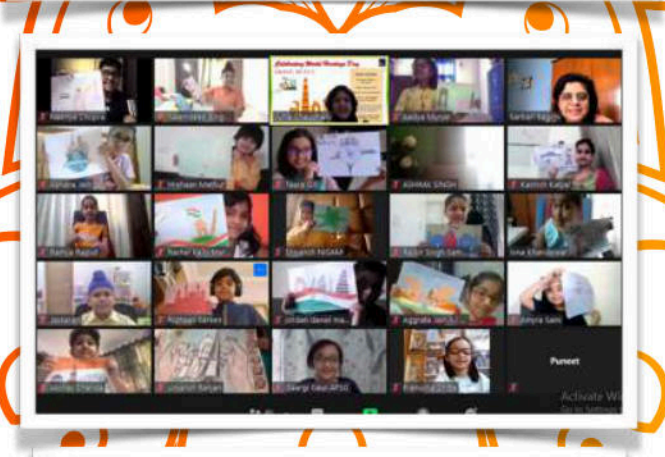

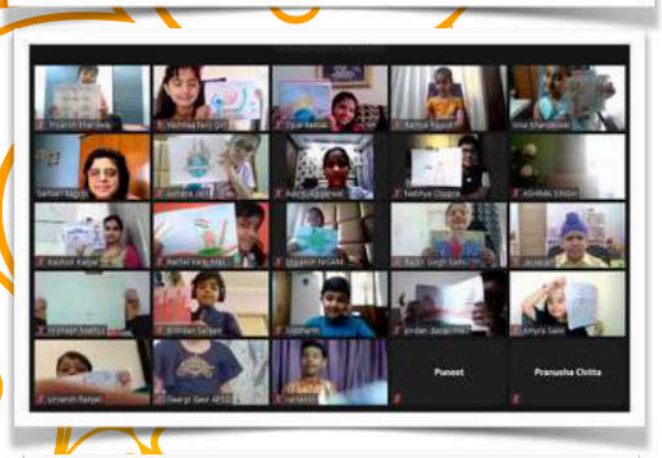

Heritage Day

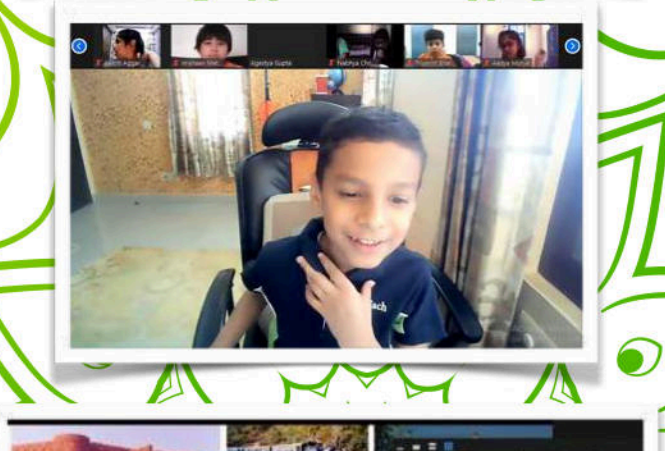

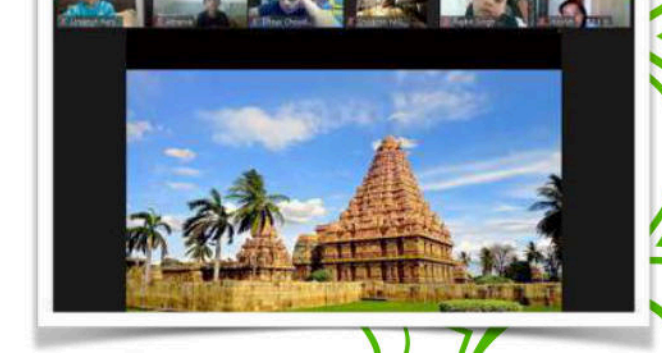

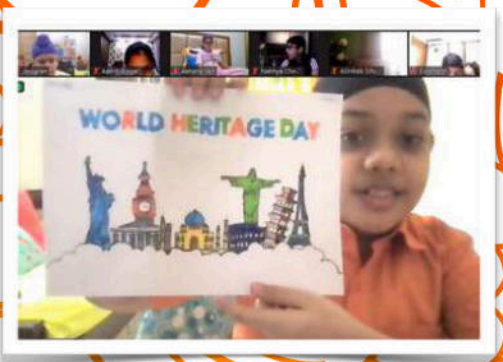

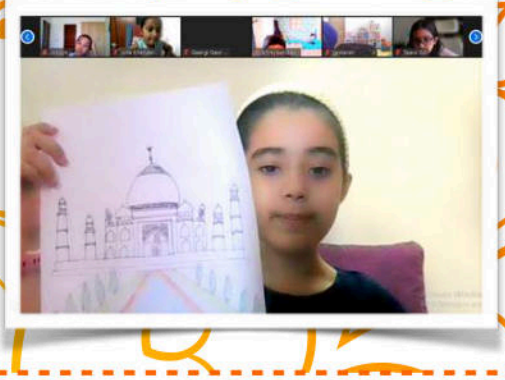

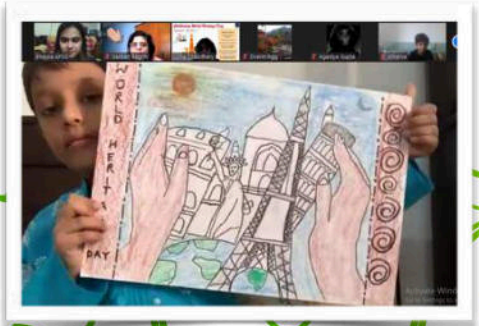

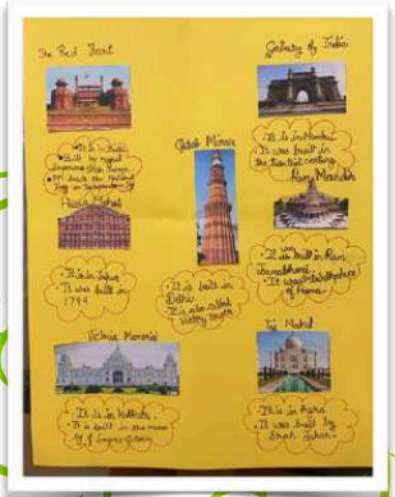

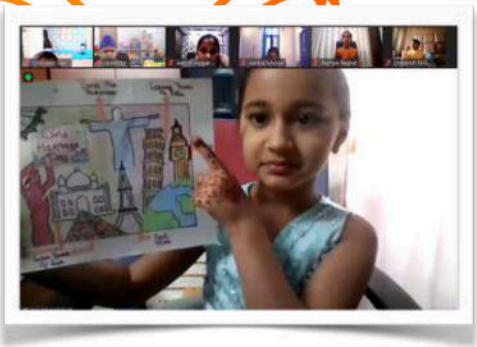

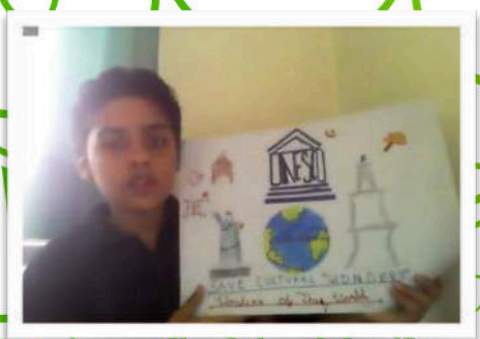

In the face of the ongoing global crisis, we at Ambience Public School celebrated The World Heritage day with the theme 'shared cultures, shared heritage , shared responsibility.'
A lot of activities including virtual tours, poster making and exploring various heritage sites helped spread awareness about our shared cultural heritage and rich cultural history.

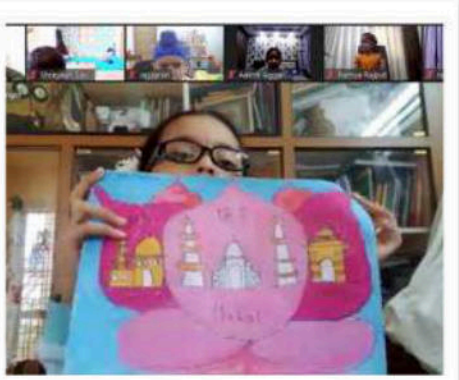

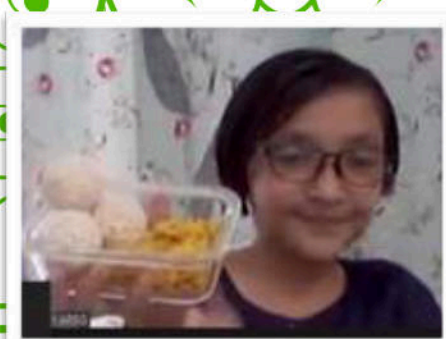

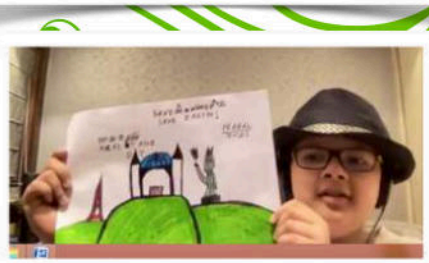

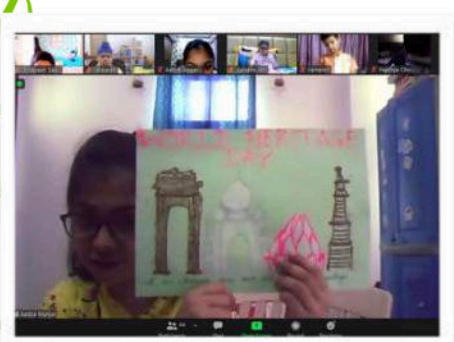

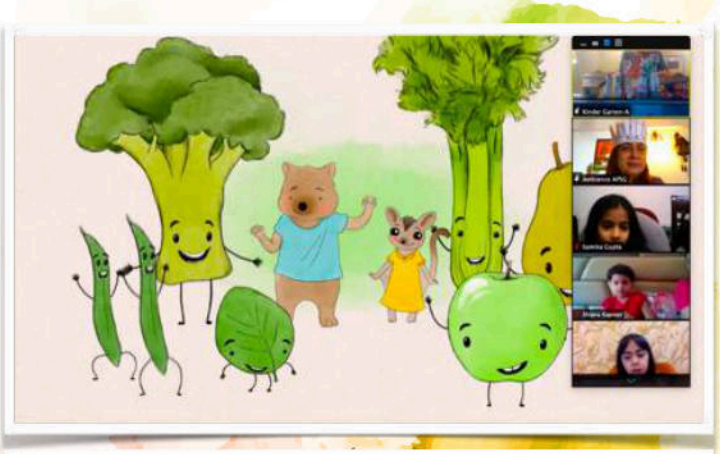

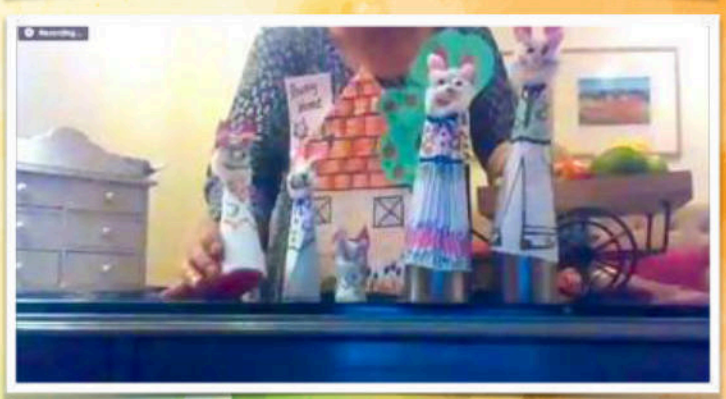

PRE-PRIMARY FUNTOOLICIOUS

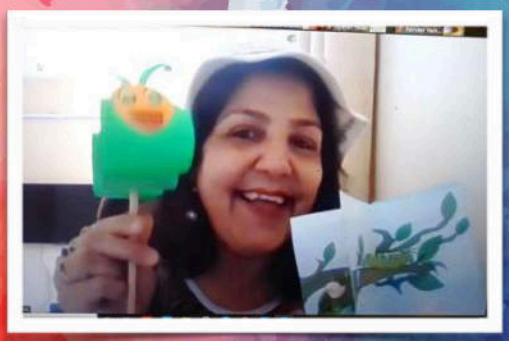

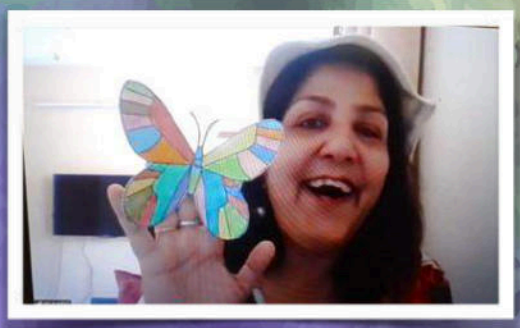

You are unique, you are special, you are amazing - like the butterfly.

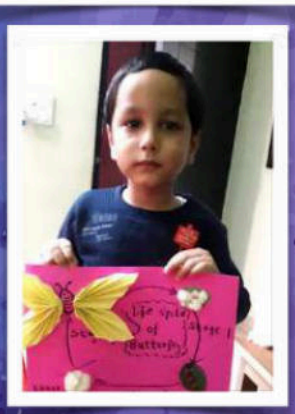

Ambience little caterpillars transforming into butterflies

FUNTOOLICIOUS

Story time - Shipra Malhotra

"Storytelling is the most powerful way to put ideas into the world" -Robert McKee

Storytelling integrates cognition, emotion and imagination in the learning process of our young learners. Learners of Ambience School Gurgaon had a fun-filled interactive session on storytelling where they brought alive the characters through their simple but explicatory illustrations.

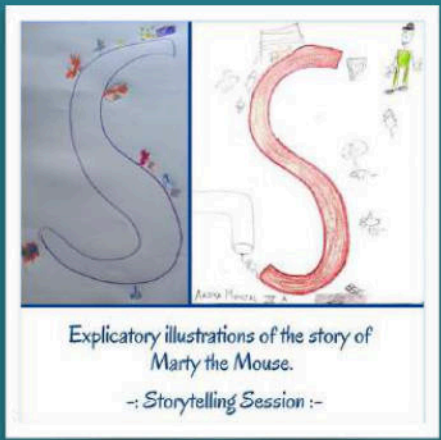

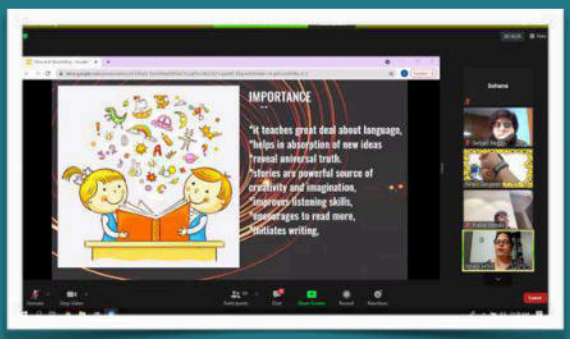

Story time - Ms. Shubinder

The world is shaped by two things – stories told and the memories they leave behind. – Vera Nazarian (Armenian-Russian American writer of fantasy and science fiction, artist and publisher)

Stories spark a child's imagination and stimulate curiosity. In our Storytelling session on 8th May Saturday, 2021 we watched our Grade 4-9 learners donning the hat of illustrators, this time. They brought alive the characters through their simple but explicatory illustrations while they listened to the story of Marty the Mouse.

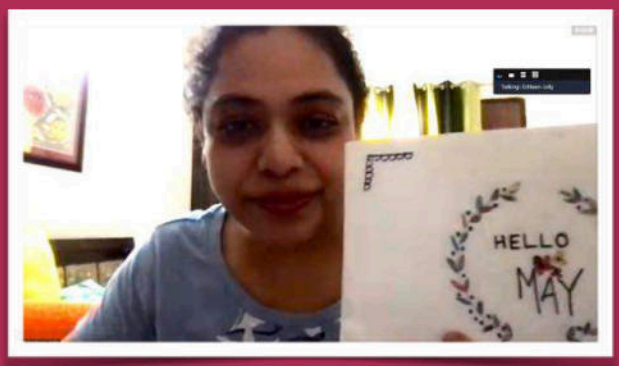

Oodle Doodle - Ms. Eshleen Jolly

Summer Funtooliscious at the Ambience School Gurugram started today by welcoming the month of May through pretty 'fundoodles'. Ms. Eshleen Jolly from our very own parent community conducted a session for the young enthusiasts of Grade 1-3 with her doodling session 'Oodle doodle'!

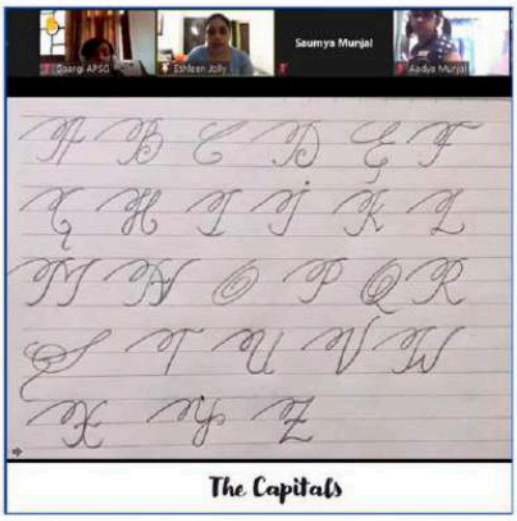

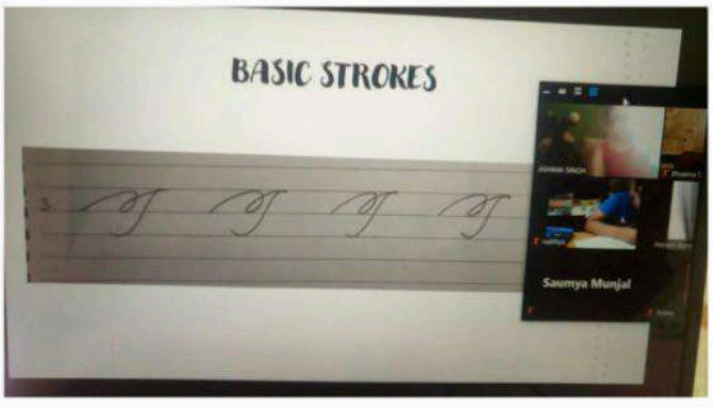

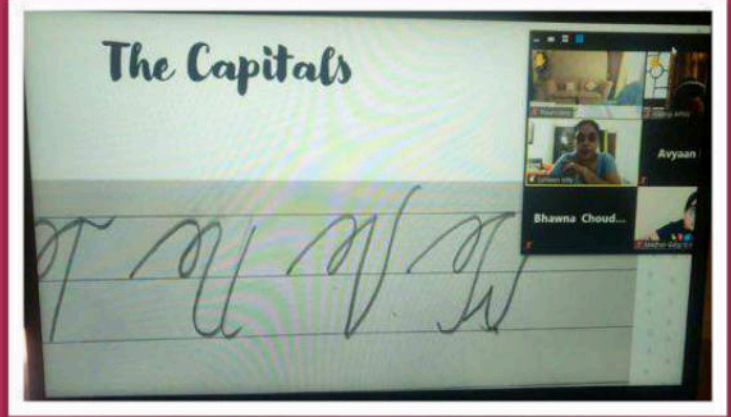

Penmanship - Ms. Eshleen Jolly

Clench and release your fingers, rub and move your hands in circles to warm up - this is how we began the summer fun at Ambience Public School.

Ms. Eshleen Jolly from our very own parent community engaged the creative enthusiasts of Grade 4-9 in the session "Penmanship" to learn that Calligraphy takes a hand, opens a mind and touches hearts.

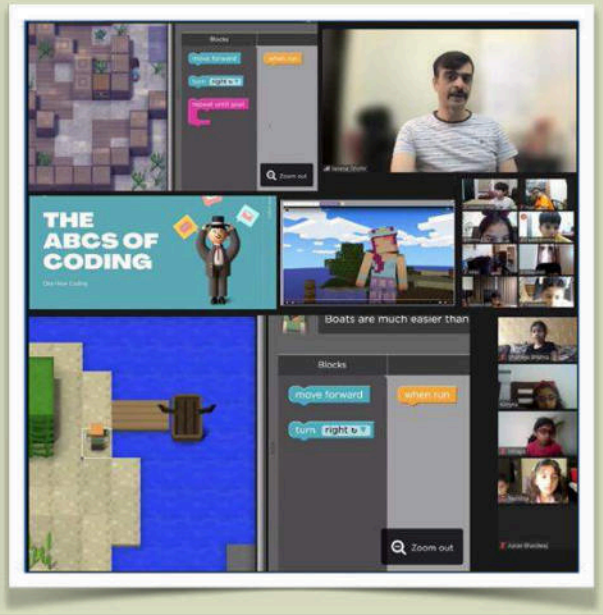

Coding bytes- Mr.Shishir Saxena

Sometimes it gets difficult to control screen time for children at home but channelizing that energy into something meaningful is always a possibility.
Mr. Shishir Saxena, an IT professional and one of our parents engaged children by introducing coding in a very fun way. He also introduced many online platforms where children can learn the basics of coding independently and free of cost. Looking at the age group, he selected Minecraft puzzles with Blockify coding blocks and the kids had a great time.

Baking Fun - Mr.Sethi

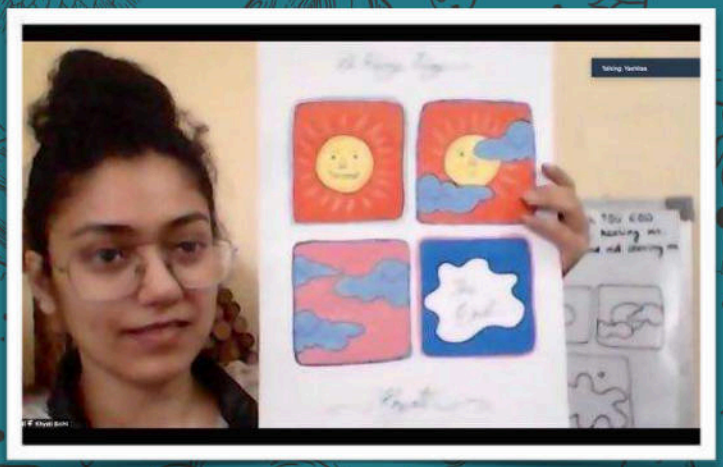

Mr Sethi conducted a baking session with our students. He taught how to bake a microwave cake. The ingredient list was sent to the students in advance. He not only demonstrated how to bake an instant chocolate cake in a mug, he also showed how to make rainbow cookies. He also took a little time of the session to answer doubts which students had about baking temperature, ingredient list etc.

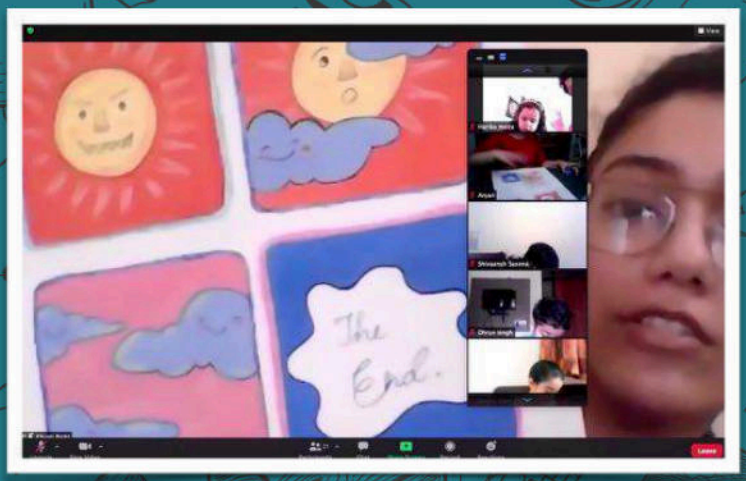

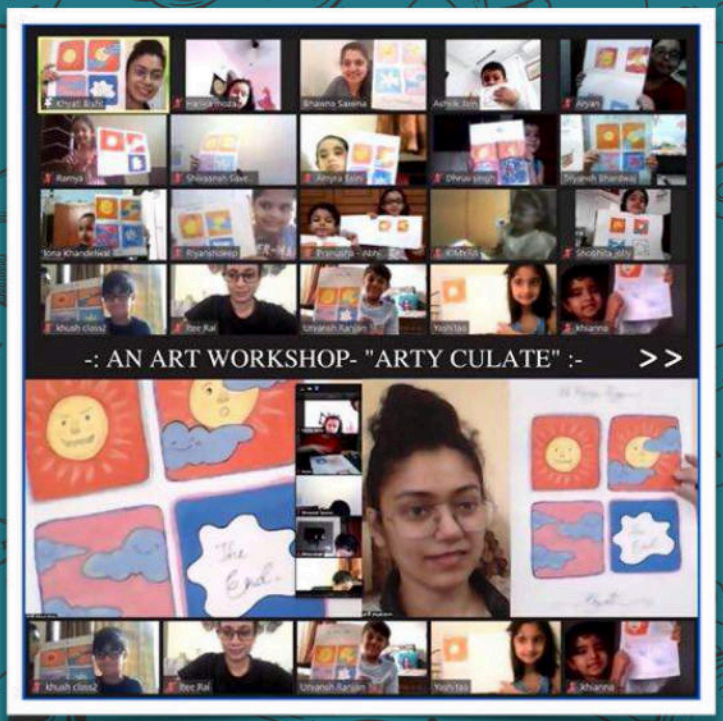

Arty-culate -Khyati Bisht

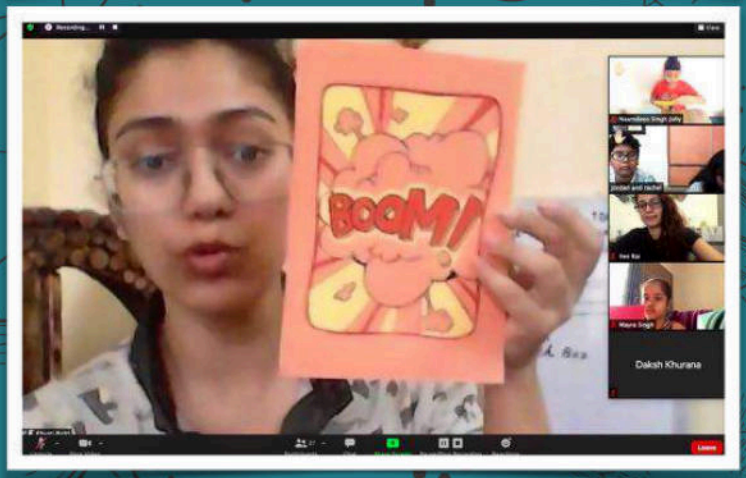

Ambience School Gurugram organised 'Arty culate', an Art workshop with Ms. Khyati, an artist and a Children's Book Illustrator. The children learnt that by using only 4-6 frames in a creative manner one can create interesting short comic strips and books.

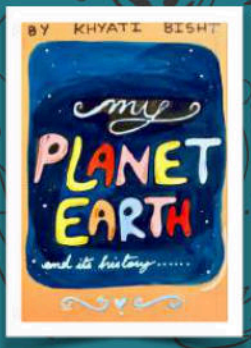

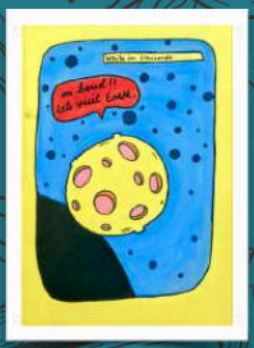

Cat In Rainy Trouble

The rain was wet and I never really had been a fan of wet cold rain. That day I hadn't realised the change in weather in time to seek proper shelter so I ended up having to find shelter under one of the hotel coffee tables that were placed outside. I barely ran under there in time. The rain had managed to attack my tail and my paws were wet. I still managed to feel grateful for my still dry limbs and flanks that had survived the worst of the shower. I sat there staring miserably out into the rain after having licked my fur back into place.

Soon I got so bored I became interested in the ripples that the raindrops formed in the water puddles. I wished I had the energy to sing that human nursery rhyme about asking the rain to go away.

"Rain, rain go away,

Come again another day,

This cat wants to play,

Come again another day"

Or something like that. And to make things worse, a very American-looking lady made her way towards me. I had had my own share of run-ins with dishevelled tourists who wanted to pat me and take me home and I knew for a fact that I strongly disliked them. One might even say that I hated them.

Fully aware of the cooing and fake meows I was about to face if I stayed any longer, I quickly, but reluctantly, turned tail and fled from the cover of the table and sought shade under the rafters where I wouldn't be spotted easily by the untrained eye. I saw the lady rush back inside, visibly disappointed at my departure, and wary of the rain shower. A few moments later, the padrone came to collect me. I knew he was a kind and respected person who occasionally fed me leftovers from their kitchen. So naturally, I trusted him when he picked me up and took me into the shelter of the hotel lobby.

But never in a million years would I have expected him to betray me by asking the maid to take me up to the American lady's room and present me to her as a gift. I was horrified. I was in for the horror of my life! Lord have mercy...

Avantika Choudhary
Grade 9

My take on the year 2020....

2020 was a tough year and a hard year for all of us. No one thought that this virus will kill or change their life upside down also no one imagined that this type of virus will ever occur. This year was very tough, we all couldn't go to school due to this virus.we started doing online classes. But there was good part also when this virus came we got to spend more time with our family's and get to take care of our mental health and our body too. We got to learn a lot of things in this time period like I started playing chess with my dad and after playing a lot of chess games I was improving. To be honest online school is not that bad like I learn to do all the things by myself and how to manage all my work with the timeline. We all go a routine too. This year was unexpected but good , because I got to spend more time with my family and I did all my work by myself . This year came and was gone , It tough us a lot of things too like how to adjust with this virus and how to live with it because it will take to go fully.

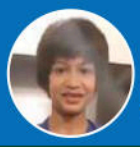

ANANYA Gr8

2020 was a good year because we had to attend school online in the comfort of our home. And we learnt about many new things such as padlet, zoom, quizzes etc. The only bad thing about this year is of the corona virus and many people died and got ill. But there were some advantages of this year that was we had so much free time and we were able to spend time and play games with our family and friends.

KABIR

The last year was not that great as I could not go to school and not play outside but I had time to spend time with my family. My dad and I had played indoor games and after a week are online school started I learnt how to operate zoom it was not that fun in online classes and I hope that the schools open again. I could not believe that how we could do the assemblies, I learnt how to make cakes, mug cakes and donuts.I did online guitar classes and other classes.All of my friends and I did a zoom call and played games like scribble.io, quizzes etc.
We had a lot of fun.

HRIDAY Gr6

2020 was the worst year of my life. I had no friends in my class and the other friends were far away from me. Due to the pandemic I could not meet them which is the worst of 2020. I loved the thing that I got to play many new games and met many new friends in the game. Although 2020 is still the worst year.

AMOL Gr8

The last year was not that great we all could not go any where so it was quite boring but we could play with our family board game's. Then the saviour of the world came "ZOOM" he helped us to meet each other. we also learnt about new app's like:- quizzes, scribble.io, etc.

JIVIKA Gr6

This year was very challenging but I like this year in some ways like we experienced online classes which is superb,
in this year. I started doing my all the work by my self only, it changed my opinion on yoga that yoga is not that bad. when I heard of many deaths due to corona then I got scared that what is I will be affected with corona virus but then my mother father supported me and said that don't think negative as not corona but stress will affect me and by chance I would be affected I will get with the corona virus. I learned that health is really important and now it is ending now I am missing those days but I am also very excited to meet my teachers and friends offline and travel, meet my family and i don't know that how I adjusted this year but am happy that it is going to end now.

AKSHITA Gr8

We did not have much fun it was all online and was so boring I really want to go to school we just had to sit in front of the computer all the time but still we learned some thing. There were internet problems it was kind of interesting joining links ID and passwords I learned how to cook food. We also had online assembly online sports day too.

VAANYA Gr6

The last year was not a good time because a virus came. Because of this virus our school got closed for a long time and then we had online classes I was sad that we could not go to school and we could not play that much physical games as we played in the school like- football, cricket badminton and tennis. But we learnt a lot of lessons from the last year like- I learnt how to operate my computer, I was better at reading

AARAV Gr6

Madhav Gr7

The year gone by was a different and difficult year. From January to mid march everything was ok. From lockdown it was difficult but, we learned several things like cooking, coding, yoga etc . We were not so well versed with the pandemic and online classes. It took a while and then we got well known with all virtual things like classes parties and what not. And now we are here in 2021 with the pandemic facing the challenge and fighting from the pandemic .

Last year we had a different time then the other years. In 2020 we had online classes in online classes we learned so many different things like padlet, goole forms, PDF, gmail and much more. We had some problem like internet issue so most of the time we can't understand things. But we had a good time in 2020.

KENISHA Gr6

Ranvijay Raghuvanshi Gr7

The year 2020 was very tough. After some time came a deadly virus named coronavirus. We could not go to physical school. Although we continued our learning with online classes.

We almost did everything in the online classes that we did in the physical school. We did online parties, Online LLC, Online assemblies and a lot more. This experience was tough but very great too. In this time I worked on many things like - Training, sketching, writing and wellness. I hope that I will see my friends again, surly after some time physically.

Abeer Sangwan Gr7

The year 2020 was very boring and i hated it. The year 2020 started in a best note but before that a deadly virus started named as coronavirus. Lakhs of people died. Hmmm..... i wonder that 2021 should not be boring. The coronavirus should end now. I am fed up with this horrific virus which is very dangerous for everybody, all time sitting in the home, doing online classes not even going out. In the end I wanna say that "keep wondering and dreaming till the virus doesn't end" I HATE COVID-19

Ansh Jain Gr7

The year 2020 was like a flash but it taught us many new things like, I never knew that we could also do online classes. Yeah it was no that great as it seemed, yep but we didn't have any other option except of online classes . We did online parties, online talks and also we were not able to meet anyone. We saw many-many constellation and clear sky, moon, star and also there was no pollution . I wished new things at 12 pm in night of 2020 31 December for 2021 should be great and for myself and now own versed you should also wish something . 2020 won by 2021

When I am back at School... I will.....

Grade 3

When I am back to school
I will talk a lot with my friends.
I will share treats with my friends.

Aahana

Urvansh

We will run in the track and have sport days, I can swim in the pool ,I can play football with my friend and we can go to the library in our school

I will play with everybody.

Triyansh

I will play with my friends. I will meet my teachers. I will meet my she's. I will give some lollypops to Shukrona. Have a party with shukrona. I am excited to go to school and play. I will run and play. I will chat with my friends and learn more new things.

Yashitaa

When i am back in school i will talk to all my friends, talk to my teacher and give her a present i will work hard in study read many books also play with many of my friends say hi to some of my old teacher keep every thing clean make more friends and celebrate with my friends that school is open i also want to play with shesat the end of the day and i am very excited for that day yay and try to enjoy a bit of sports yay

Amyra Saini

-I will meet all my teachers and friends. I will also play football and badminton with my friends. I am looking forward to do swimming in the pool. I also plan to study hard and learn many things.

Daksh

I will be playing, studying and meeting with my friends and teachers. I will be enjoying outdoor sports class
I will share my lockdown experience.

Shivansh Nigam

When I am back in my school I will play with my friends.
I will meet my teachers .
I'll read many books in the school library.
I would love to see the she's in the sh tank .I will chat with my friends.
I am so excited to see my beautiful school.

Amyrah Chowdhry

When I am back in my school then
I will meet my friends and teachers.
Then I will play with my best friends
I will go to see the activity room
And I will do a big Party for my teachers because how much they have supported me and my friends
and I will bring many many Lollipops

Iona

When I will come to school , I would love to meet teachers and chat with my friend and play with everybody and I will have a lot of fun and study a lot and read books in the library and do crafts and fun!

Vivaan

Pranusha

We will play together.
i will bring lollipops for my friends.

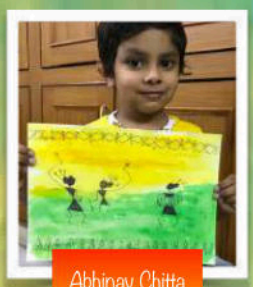

-1. When I am back in school I am going to meet my friends and my teachers.
2. I am going to have fun at school because I am going to play foot ball and cricket. 3. When I am going to be in grade 3 I am going to be a big brother because at march a baby brother or sister is going to come out of my moms tummy.

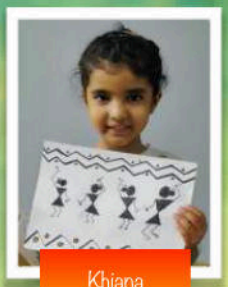

Rajbir Singh Samyal.

Agastya

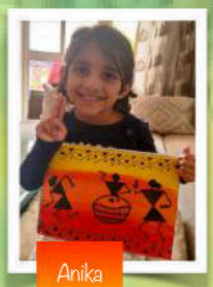

Throw a pizza party to celebrate
and give most of my pizza to urvansh and rajbir
