VOL I NOVEMBER 2020

New Shoots

The Ambience Newsletter

Dear Children

Thank you for utilising your time to hone your Reading skills. I have been enjoying the story telling sessions that our young Readers are engaging in.

You know Reading is a great skill. It not only helps us to learn and make sense of the world , it also helps us to travel and visit places and meet people! Also some stories have such an impact on our life. Today I want to share a short story "The Three Questions" written by the famous writer Leo Tolstoy which has impacted me personally.

The story is about a King who, while engaged in the affairs of the state had three questions plaguing him.

The first question was, "When is the best time to start a task? How do we know it is the right time for the action so that we have no regrets?"

The second question is, "Who is the most important person to whom we should pay attention to?"

The third question was, "What affairs or tasks are most important for us?"

Many people came and tried to answer the questions but to no avail as the emperor was not satisfied with their answers.

Finally a wise hermit arrived and this is how he addressed the three questions.

"The best time to start the task is now. The most important person is the one in front of you right now and the most important task is doing good and caring about others' happiness."

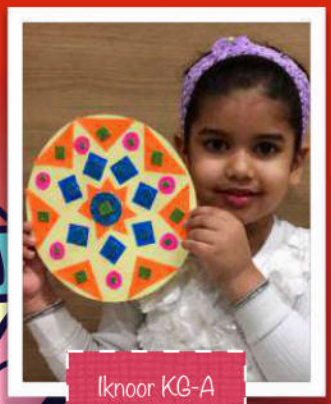

This moment is precious so anything we do we should do with this awareness putting in our very best effort. Similarly we do not need to look for people in far off places but those in our immediate surroundings. Valuing those around us and learning from them helps us to not just win their hearts but also brings happiness.

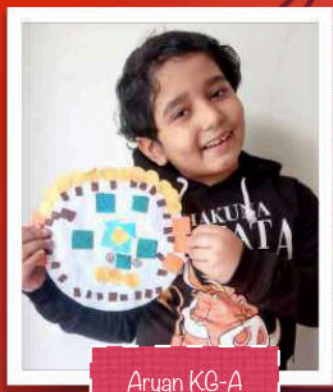

So this month in the true spirit of Christmas let us see how we can spread joy around us through little actions like acknowledging and appreciating efforts, doing little things, running errands, sharing and being there for our friends and family.

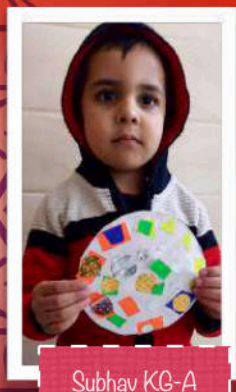

Let us make this December very special by ending this year on a happy and victorious note!

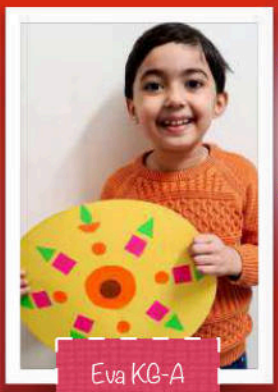

I am very proud of your efforts!

Stay safe and stay blessed!

Grade 1 : Saving my beautiful planet

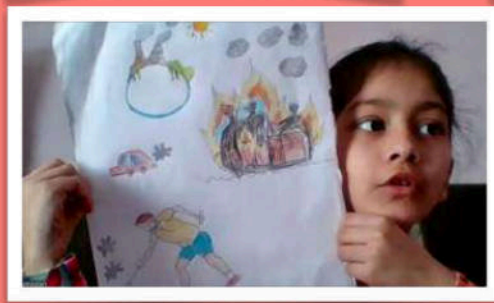

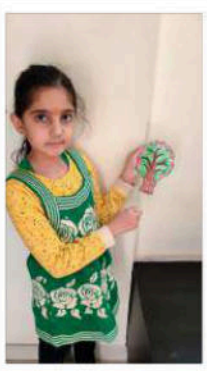

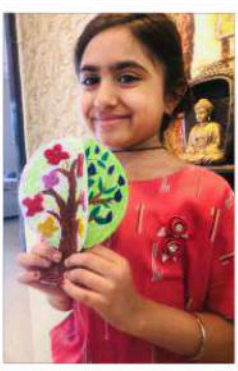

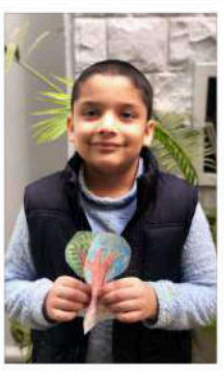

Grade 2 : What a fun & unique way to learn directions & Seasons !

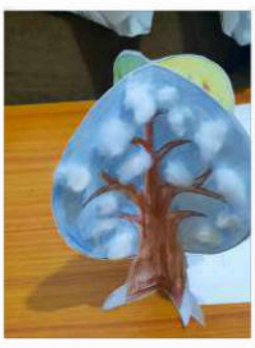

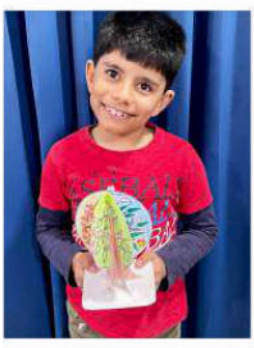

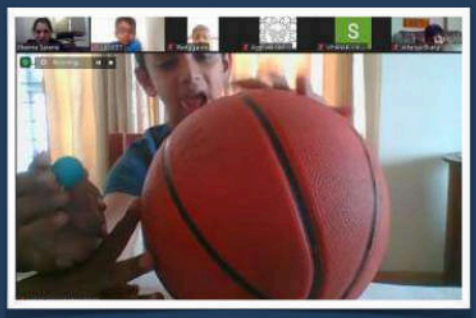

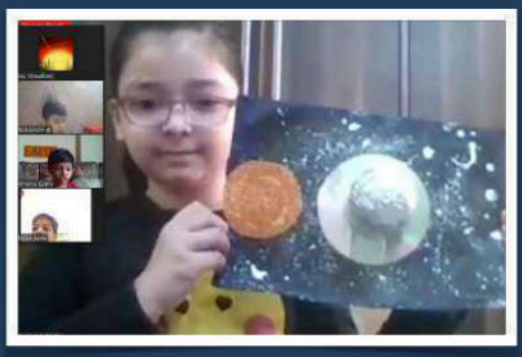

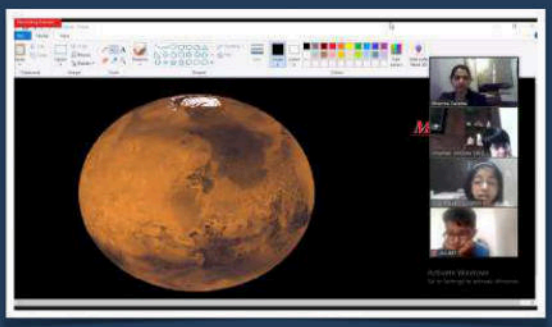

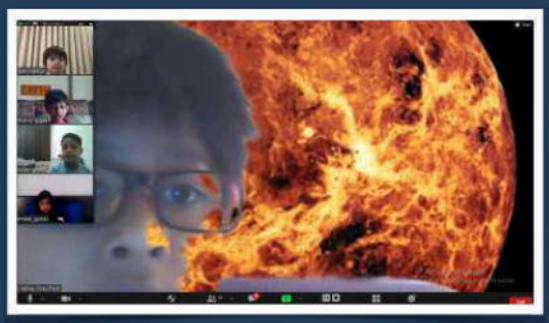

Grade 3 : Discovering planets of the solar system through creative and engaging methods.

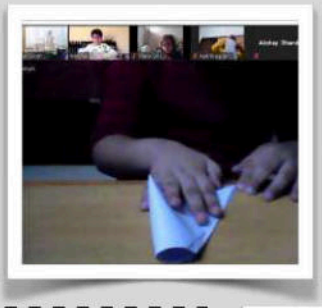

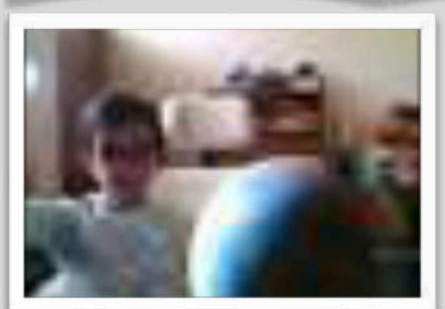

Grade 4 : Grade 4 pledged for a Cracker free Diwali. The learners shared ideas for creating Eco friendly crackers.

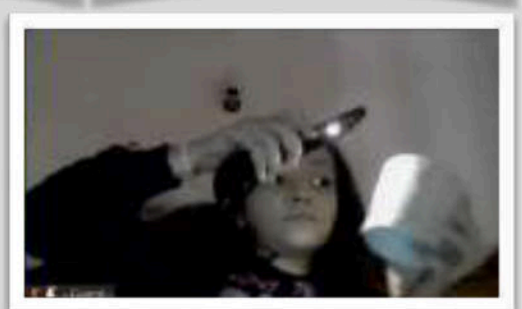

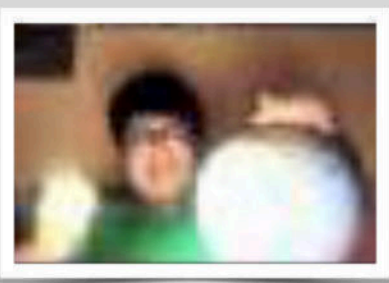

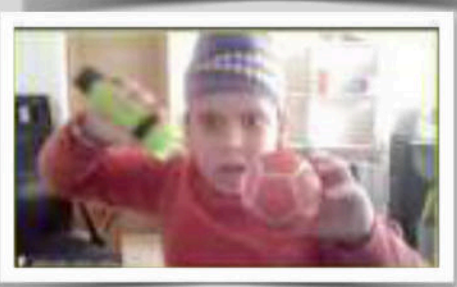

Learn Play Imagine

Inquiry on the formation of Day & Night .

Grade 5 : Reflecting upon our own inner light that guides us !

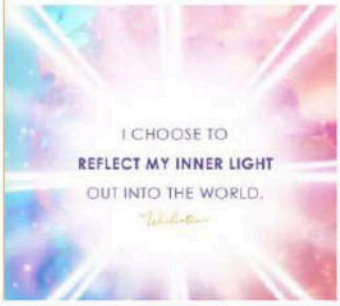

aarav

My inner light guides me to success but sometimes when I do not listen to my inner light I lose. When I listen to my inner light I always win, I never lose when I listen to my inner light, but sometimes my inner get wrong too only when I misuse it. Ex:- when it was my exam I listened to my inner light that this was the answer, for some time it was fine but when I asked a lot of questions I went in overconfidence and greed and because of that I did not get good marks and my mom scolded me, After that, I never misused my inner light and always did everything patiently.

The inner light is the light which God has given us and it is inside our soul, when we misuse it we can never win but when we use it carefully and

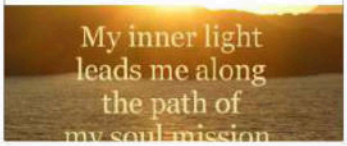

vaanya

MY inner light guides me to love ,kindness ,joy. it guides me to helping other people which makes my soul happy.

Kenisha

My inner light guides me to happiness. when anyone makes me unhappy still I try to be happy. 🤣When I do not listen to my inner light, I always go wrong. So I always follow my inner light.

armaan

my inner light guides me to conscience.it guides me to the path of success.it tells me to listen to my heart it makes me happy ., it tells me which people are good or bad. my inner light is my motivator.

jivika

my inner light guides me to the path of success. it guides me to listen to my heart and myself.

KIMAYA

My inner light guides me to do the right thing whether it is small or big. When I do not follow my inner light, I at times get it wrong

Ira

Whenever I get teased by someone then I find joy and happiness hiding 😇. Inner light guides me to Happiness and joy 😍

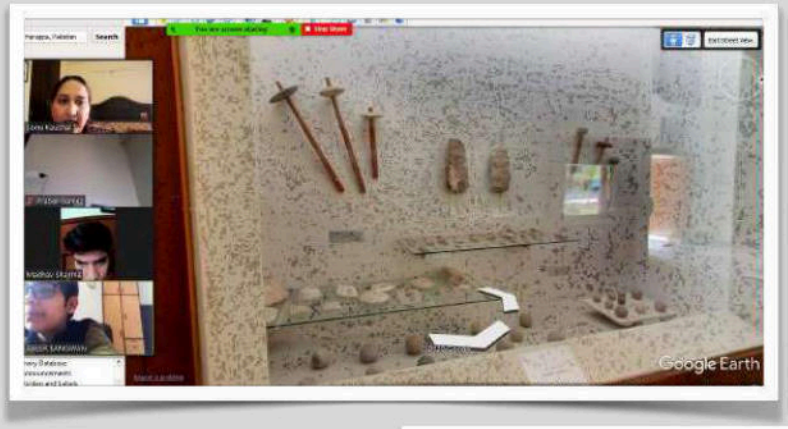

hriday

My inner light guides me to workhard, do the right things and to help other people.

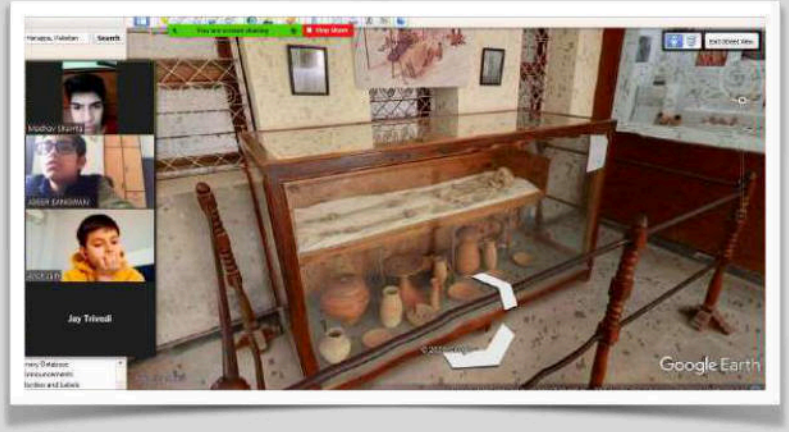

NAVYA

My inner light guides me to joy

Grade 6 : Learning without borders. Students of Gr6 were taken on a virtual trip to the Harappa Museum in Pakistan.

Kabir

what I know about blood-
I know that blood is full of oxygen and is extremely important for humans and it is present in humans and various other creatures.
what I want to know-
Does every living organism have blood present in it ?
At what speed does blood travel?

Aananya:-

What I know - The blood has oxygen in it and it's very important for humans. Blood is the major thing we need for our survival. The blood flows from our body and gives oxygen or water to other parts of our body .

What I want to know - when we tie a rubbery band on our finger the upper part gets red and very big why does this happen and what will happen if we don't have blood inside our body .

Amol

What I know about blood?
Blood plays a major role in the survival of animals and human beings. It helps water flow in the body and travels oxygen and other gases pass to different parts of the body. I want to know how blood is generated in our body?

Grade 7 : What do you know and what you want to know about "blood"?

Ranveer

What I want to know -
What is blood made of ?
How much oxygen can RBC carry?
Does WBC carry oxygen?

What I know - blood keeps us alive. It carries oxygen, it takes out carbon dioxide, it runs through our cell's also
It helps to fight infection
Names of some blood vessels -
Arteries
Capillaries

AKSHITA

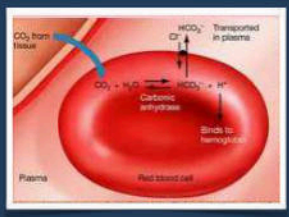

Red blood vessels carry oxygen to lungs and then to other organs of your body. It is the main source of our body; without blood our body is like a carrot pudding without carrot.
WHAT I WANT TO KNOW
how blood originates in our body and how, why it is very important for living beings.

Miraya

What I know- blood is important for our human system. It goes to each part of our body.
What I want to know- When we tie a rubber band on our finger for a long time our finger starts getting white and if we don't remove the rubber doctor advise to cut the part of that finger. Why is it so?

After a discussion on What do you understand by the term 'intravenous injection'? Why do you think doctors administer intravenous injections and not give oral tablets in some cases? Do you think it is more efficient?
....students penned down what they know about blood and what more they would like to know about the Circulatory system in human beings.

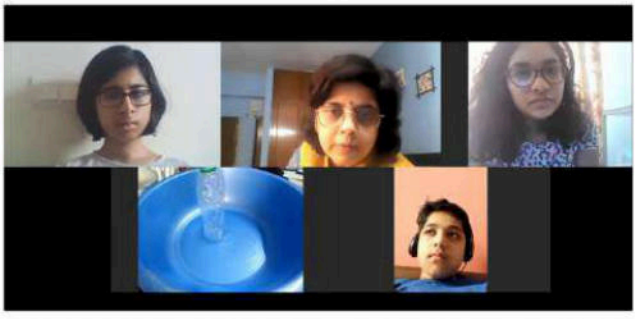

Kabir

blood vessels are the road on which scooter travels and blood cells are like scooties. example zomato

Grade 8 : Learners observed experiments on pressure of liquid and arrived at their own conclusions based on what they saw.

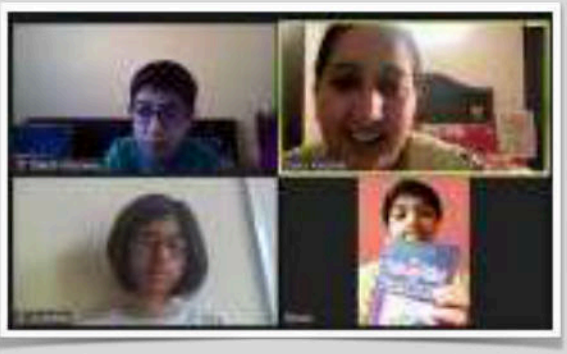

Grade 8 students celebrating childhood in their circle time by sharing their favourite books/ stories.

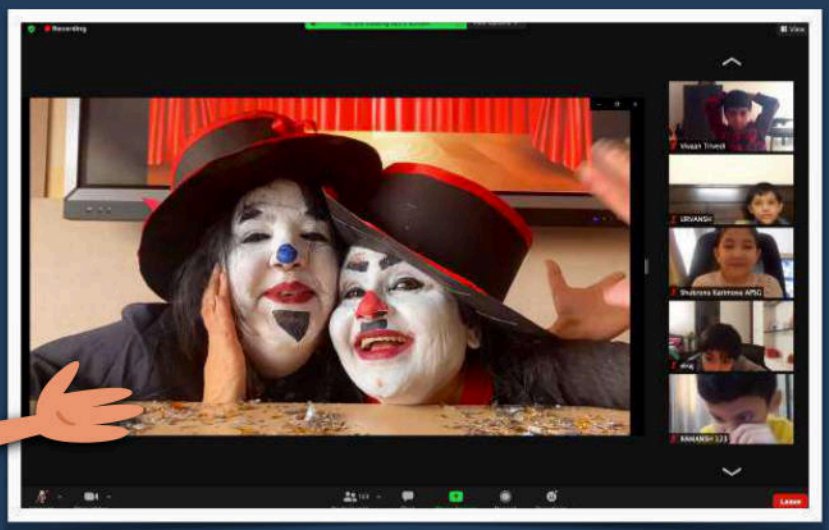

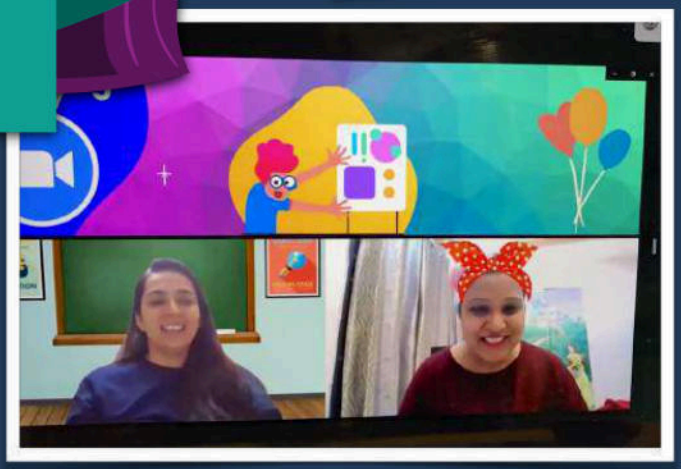

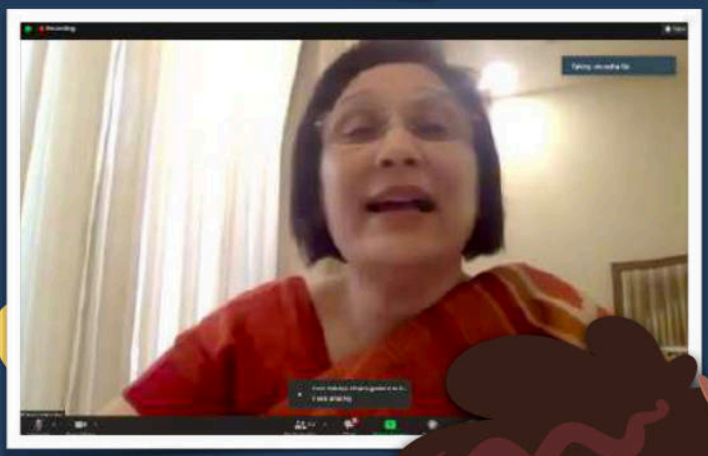

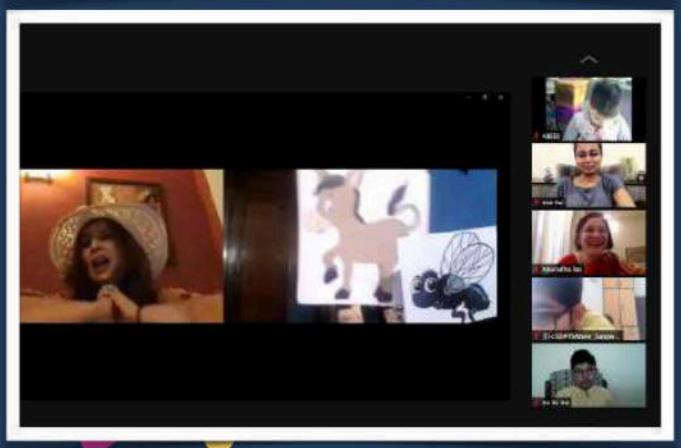

A Glimpse of Children's Day celebration !!
