VOL I

OCTOBER 2020

New Shoots

The Ambience Newsletter

Dear Children,

We have just concluded our first term assessment and Learner Led Conference. It gladdens my heart and makes me very proud of what all of you have achieved so far.

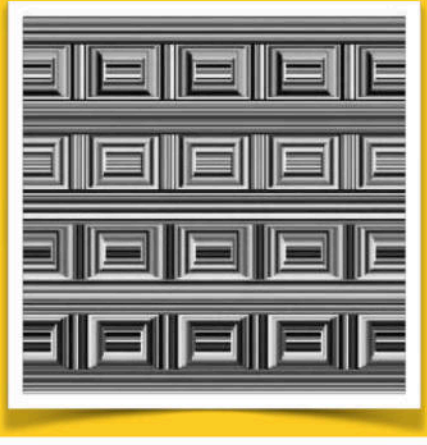

Thank you for all the hard work! Going forward I know all of you have set new goals for yourself. During the second term please keep these goals in mind and look for opportunities that will help you to reach your goals and manifest your highest potential. During this journey there may be times when you are not able to do something **yet**. Instead of feeling discouraged let us persevere and not give up. You will be surprised to see how you will in fact be able to achieve more than what you initially set out to do! One thing that I have learnt in life is that there is nothing that we cannot achieve if we really set our mind to it. So Let Us Master our mind and make the best of every situation looking at it as a great learning opportunity.

Wishing you and your parents the very best during the coming festive season. I pray for your safety and well-being every day.

God bless.

Before we start, here's a little Brain Teaser for you !

Can you tell how many circles are there in the image on the right ?!?
